

Praesto Tableau Server Health Check

How to keep your Tableau Server healthy

What is our health check for Tableau Server?

Your organization relies on your ability to deliver information on demand. It's a simple fact. But over time, systems evolve. They shift under the stresses of new user population demands, multiple developments, and reporting requirement changes. That's why Praesto developed the Tableau Server Health Check; so, you can identify potential weaknesses in your Tableau Server system before they turn into big problems.

While a periodic Tableau Server Health Check is recommended for all deployments, it is especially essential when:

- ✓ The actual system usage has differed over time from the system's initial design.
- ✓ Performance and response times are not at expected levels or are declining.
- ✓ Planning to migrate to a new platform or software version.

Process	Node1 Indicbwaipov01	Node2 Indicbwaipov02	Node3 Indicbwaipov03	Node4 Indicbwaipov04
Cluster Controller	✓	✓	✓	✓
Gateway	✓	✓	✓	✓
Application Server	✓	✓	✓	✓
WebQ Server	✓	✓	✓	✓
Cache Server	✓	✓	✓	✓
Search & Browse	✓	✓	✓	✓
Background	✓	✓	✓	✓
Data Server	✓	✓	✓	✓
Data Engine	✓	✓	✓	✓
File Store	✓	✓	✓	✓
Repository	Active/Passive	Passive	✓	Synchronizing
Coordinator	✓	✓	✓	✓

How will it be conducted?

Our Tableau Health Check starts with interviews with administrators and key-users (creators) to define bottlenecks and issues. Secondly, we do a review of the Tableau Server, Data Sources and the Tableau Server operations. Finally, we produce a list of recommendations and actions to solve the bottlenecks.

Why Tableau Server Health Check?

Why do you need it?

- ✓ Get higher user satisfaction and increased user adoption.
- ✓ More efficient use and better management of the Tableau Server and licenses.
- ✓ More robust security and auditing management.
- ✓ More stability with increased reliability and up-time.

What will be provided?

- ✓ Report about the current state of the Tableau Server environment.
- ✓ List of recommendations where immediate changes will be implemented to address specific issues.
- ✓ Roadmap detailing specific actions to meet the organisational vision.

How much will it cost?

€ 3.500 excluding VAT

Why Praesto?

- ✓ Praesto has **intimate knowledge** of Tableau Desktop and Server. We know how it can be leveraged to deliver the most value to your business.
- ✓ With **invaluable experience** in implementing Tableau we shall enable you to deploy a solution faster than you thought possible whilst avoiding the pitfalls.
- ✓ We have a **proven track record**, we are proud that Tableau see us as the "go to people" when they need to get things done right, first time.
- ✓ We insist on **nothing but the best** – by heavily investing in recruitment, strictly adhering to the highest standards and perfecting our own training we consistently produce the best consultants with deep industry knowledge.
- ✓ **We get things done** – using the most effective people mean fewer are required. Our highly focused teams are more agile and deliver faster to a higher standard.
